COMP 9900 Retrospective B

Team: H13A-AboutToGraduate

Date:
July 24, 2021

Time:
15:00-15:40

Present Team Members:

Yunfan Wang	Z5171928
Qinyu Chen	Z5242233
Xiaocong Chen	Z5282006
Zhiyu Gu	Z5240598
Zihan Yu	Z5242308

Retrospective Content:

Back track of Retrospective A

1. Qinyu clarified all parameters that font end needs and what will pass to back end so members responsible for back end are able to complete functions independently. As a result, our conflicts have a significant decrease compared to Sprint1.

2. All team members will pull latest version of work by Git and push their work to Git immediately once they finish their job, so synchronization problem solved. We didn't meet any severe problem on our version control issue.

3. All user stories in Jira are assigned to specific person by Zhiyu, so all team members have a clearer view to know how the whole project going.

What went well

1. Functionalities in Sprint 1 had a cross check by our team members to eliminate potential bugs and some functionalities are optimized to provide a better experience for our users.

2. Generally speaking, the whole project went smoothly and, by far, we have our project ahead of schedule and all important functions for Sprint3 have been

completed and tested.

What didn't go so well

1. Since most of our current work is focused on the functionalities of the project, some detail of our web design needs to be embellished to provide our user a cleaner and user-friendly interface.

2. Although more objectives for the projects have been completed, our project is lack of some functional and technical novelty

3. Some buttons or text can be confused for our users.

To try and the supervisor

1. Our team members should make a test plan for all functions from website and pay more attention to the structure of the website. Qinyu will organize our team and arrange the schedule to perform the test.

2. We all have another meeting closely to discuss what novelty we can add and Xiaocong and Zihan will oversee the development of new functions.

3. Yunfan might invited some friends to visit our webpage to evaluate the whole web and make updates to clarify those vague buttons and texts.
